

# Universiteit van Pretoria Jaarboek 2018

## Gevorderde aspekte van operasionele navorsing 780 (BAO 780)

<b>Kwalifikasie</b>	Nagraads
<b>Fakulteit</b>	Fakulteit Ingenieurswese, Bou-omgewing en Inligtingtegnologie
<b>Modulekrediete</b>	16.00
<b>Voorvereistes</b>	Geen voorvereistes.
<b>Kontaktyd</b>	24 kontakure
<b>Onderrigtaal</b>	Module word in Engels aangebied
<b>Departement</b>	Bedryfs- en Sisteemingenieurswese
<b>Aanbiedingstydperk</b>	Semester 1 of Semester 2

### Module-inhoud

\* Hierdie inligting is slegs in Engels beskikbaar.

Decision makers are frequently faced with complex problem environments. The module introduces two advanced topics in the field of Operations Research that can assist in the development of more relevant decision support models. The first topic deals with multi objectivity and introduces a variety of interventions to incorporate the competing objectives into mathematical programming models. Secondly, the topic of Data Envelopment Analysis (DEA) is introduced, a non-parametric method used to empirically measure the productive efficiency of decision-making units. This linear programming methodology allows the decision maker to measure the productivity in complex environments with multiple inputs and outputs; uncover often overlooked relationships between in- and outputs; and analyse and quantify the inefficiencies of every unit evaluated.
