

University of Pretoria Yearbook 2018

Undergraduate

Growth physiology 320 (DFS 320)

Faculty of Natural and Agricultural Sciences

Module credits 12.00

ProgrammesBScAgric Animal Science

Prerequisites DFS 311

Contact time 1 practical every 2nd week

Language of tuition Module is presented in English

Department Animal and Wildlife Sciences

Period of presentation Semester 2

Module content

Qualification

Functional anatomy, growth and development of tissues and organ systems. The underlying physiological processes in growth and development. Pre- and postnatal growth and factors which determine growth rate: growth curves, stimulants of growth, age, nutrition, breed, sex. Changes during maturation, reproduction, the post-partum period and lactation. Ageing and tissue changes with erosion diseases. The influence of hormones, production and reproduction on conformation and a critical evaluation of assessment of animals for functional efficiency.

The information published here is subject to change and may be amended after the publication of this information. The General Regulations (G Regulations) apply to all faculties of the University of Pretoria. It is expected of students to familiarise themselves well with these regulations as well as with the information contained in the General Rules section. Ignorance concerning these regulations and rules will not be accepted as an excuse for any transgression.
