

Universiteit van Pretoria Jaarboek 2018

Bioseine en -stelsels 732 (EBB 732)

Kwalifikasie Nagraads

Fakulteit [Fakulteit Ingenieurswese, Bou-omgewing en Inligtingtegnologie](#)

*Hierdie inligting is slegs in Engels beskikbaar.

The objective of the module is to teach the engineering student how to apply engineering tools to the analysis of biological systems for the purpose of (i) developing understanding of the anatomy and physiology of specific biological systems from an engineering perspective, (ii) deriving appropriate mathematical descriptions of biological systems, and (iii) engineering applicable therapeutic interventions. We will expand on the single nerve fibre studies considered in bioelectricity and electronics: where the latter examined the biophysics of single excitable cells (and electrostimulation thereof), this module will develop it into an analysis of the characteristics of populations of neurons. We will systematically develop a systems-level perspective, working our way through the hierarchical organisation of neural encoding and computation. Furthermore, we will discuss how to measure characteristics and parameters of a particular system (the auditory system) and how to glean information about lower hierarchical levels from these measurements. This is a course in modelling and measurement, using tools from signal processing, control systems, dynamics, probability theory, systems engineering and psychoacoustics.

Module-inhoud

Modulekrediete 32.00

Programme [BlngHons Bio-ingenieurswese](#)

Voorvereistes Bio-ingenieurswese: Bioëlektrisiteit en -elektronika EBE 732

Kontaktyd 32 kontakure per semester

Onderrigtaal Module word in Engels aangebied

Departement Elektriese, Elektroniese en Rekenaaringenieurswese

Aanbiedingstydperk Semester 2
