

## University of Pretoria Yearbook 2018

## Monetary economics and banking 816 (EKN 816)

| Qualification          | Postgraduate                                 |
|------------------------|--|
| Faculty                | Faculty of Economic and Management Sciences  |
| Module credits         | 10.00  |
| Programmes             | MCom Econometrics (Coursework)               |
|                        | MCom Economics (Coursework)                  |
| Service modules        | Faculty of Natural and Agricultural Sciences |
| Prerequisites          | Only for students in relevant programme      |
| Contact time           | 1 lecture per week                           |
| Language of tuition    | Module is presented in English               |
| Department             | Economics                                    |
| Period of presentation | Semester 1 or Semester 2                     |

## Module content

This module presents an advanced treatment of critical topics in monetary economics and the models economists use to investigate the interactions between real and monetary factors. It provides extensive coverage of general equilibrium (DSGE) models, models of the short-run real effects of monetary policy, and game-theoretic approaches to monetary policy. Among the topics covered are models of time consistency, monetary policy operating procedures, interest rates and monetary policy.

Throughout, this module focuses on the implications of interest rate control for monetary policy. The module is designed for advanced graduate students in monetary economics, economic researchers and economists working in policy institutions and central banks.

The module includes discussions of empirical evidence on the new Keynesian model, inflation forecast targeting models, optimal policies in forward-looking models, stability and the Taylor principle, and open economy new Keynesian models. It explicitly treats policy analysis in new Keynesian models and their underlying DSGE foundations for both a closed economy, a small open economy and a two-country world economy; the discussion includes the derivation of the policy objective function, optimal commitment and discretionary outcome, targeting rules and instrument rules.

The information published here is subject to change and may be amended after the publication of this information. The **General Regulations (G Regulations)** apply to all faculties of the University of Pretoria. It is expected of students to familiarise themselves well with these regulations as well as with the information contained in the **General Rules** section. Ignorance concerning these regulations and rules will not be accepted as an excuse for any transgression.
