

University of Pretoria Yearbook 2018

Analytical veterinary epidemiology 853 (EPL 853)

Qualification Postgraduate

Faculty [Faculty of Veterinary Science](#)

Module credits 20.00

Programmes [MSc Veterinary Epidemiology \(Coursework\)](#)

Prerequisites EPL 851 and EPL 852

Contact time 2 seminars per week

Language of tuition Module is presented in English

Department Production Animal Studies

Period of presentation Semester 2

Module content

This module provides the student with further knowledge and skills in veterinary epidemiology and an introduction to certain more advanced statistical methods commonly used in veterinary science, including adjustment for confounding, multiple linear regression, logistic regression and survival analysis, and will provide the basis for further studies and research involving these techniques.

The information published here is subject to change and may be amended after the publication of this information. The [General Regulations \(G Regulations\)](#) apply to all faculties of the University of Pretoria. It is expected of students to familiarise themselves well with these regulations as well as with the information contained in the [General Rules](#) section. Ignorance concerning these regulations and rules will not be accepted as an excuse for any transgression.
