

# Universiteit van Pretoria Jaarboek 2018

## Besluitanalise 880 (IBD 880)

<b>Kwalifikasie</b>	Nagraads
<b>Fakulteit</b>	<a href="#">Fakulteit Ingenieurswese, Bou-omgewing en Inligtingtegnologie</a>
<b>Modulekrediete</b>	10.00
<b>Programme</b>	<a href="#">MIng Tegnologie- en Tegnologiebestuur (Gedoseer)</a> <a href="#">MSc Tegnologie- en Tegnologiebestuur (Gedoseer)</a>
<b>Voorvereistes</b>	Geen voorvereistes.
<b>Kontaktyd</b>	20 kontakure
<b>Onderrigtaal</b>	Module word in Engels aangebied
<b>Departement</b>	Ingenieurs- en Tegnologiebestuur
<b>Aanbiedingstydperk</b>	Semester 1 of Semester 2

### Module-inhoud

\*Hierdie inligting is slegs in Engels beskikbaar.

Techno-economics analysis (TEA), also referred to as economic feasibility studies, is a core technique which is used to support decision making in all for-profit organisations and sometimes more broadly in the public sector. The fundamental principle of the analysis is that only investments or projects which show a positive return on investment should be approved and implemented. Although stated simply, this principle is complex to apply since it changes according to the manner in which costs and income are accounted or measured. The simplest approaches use the generic models of net present values, discounted cash flows, internal rates of return and the time value of money to compare expenses against earnings. In this module, the student will be given an introduction to the principles of techno-economics and the structure of TEA. This introduction will be followed by material on the core calculations of TEA, including present value, future value and return. The students will be required to apply the initial TEA structure to a class project in order to acquire the basic knowledge with which such an analysis can be completed, and as a consequence, how to guide decisions relating to investment in future projects.
