**Voorvereistes**

Geen voorvereistes.

**Onderrigtaal**

Module word in Engels aangebied

**Departement**

Parakliniese Wetenskappe

**Aanbiedingstydperk**

Jaar

**Module-inhoud**

\*Hierdie inligting is slegs in Engels beskikbaar.

The emphasis of the module is on practical diagnostic pathology (including forensic pathology) and its outcomes will enable a veterinarian to investigate disease and the cause of death in wildlife. The approach will emphasise the following: After conducting a necropsy, a diagnosis is finalised by also considering the results of other diagnostic tests and ancillary data; when it is not possible to make a final diagnosis, the formulation of a list of differential diagnoses and a strategy to resolve the problem; compiling interim and final report(s) that are scientifically sound, presentable to a court of law and reflect a degree of professionalism that is commensurate with a professional person. The theoretical component includes selected information dealing with incidental findings and 'non-lesions', species-specific infectious diseases, and non-infectious diseases.
