

University of Pretoria Yearbook 2018

Pasture science 213 (WDE 213)

Qualification Undergraduate

Faculty [Faculty of Veterinary Science](#)

Module content Basic principles of pasture science: the influence of biotic and abiotic factors on the productivity of different strata and components of natural and planted pastures. This will enable the student to understand the management, production, appropriate and optimal utilisation as well as the conservation of these pastures. These principles can be used to ensure sustainable animal production and health.
One large assignment to be completed during recess in addition to lecture time.

Module credits 12.00

Programmes [BVSc](#)

Service modules Faculty of Natural and Agricultural Sciences

Prerequisites No prerequisites.

Contact time 2 blocks with a total of 60 lectures

Language of tuition Module is presented in English

Department Plant and Soil Sciences

Period of presentation Semester 1
