

University of Pretoria Yearbook 2018

BSportSci (10135010)

Minimum duration of study 3 years

Total credits 409

Contact Prof PS Wood paola.wood@up.ac.za +27 (0)124206046

Programme information

This three-year full-time BSportSci programme includes basic and applied sciences of the human body and provides a pathway towards a BScHons (Biokinetics) or a BScHons (Sports Science). Qualified BSc (Sports Science) students may also either apply for the Postgraduate Certificate in Education or start working in the sporting industry.

Admission requirements

- The following persons will be considered for admission: a candidate who is in possession of a certificate that is deemed by the University to be equivalent to the required Grade 12 certificate with university endorsement; a candidate who is a graduate from another tertiary institution or has been granted the status of a graduate of such an institution; and a candidate who is a graduate of another faculty at the University of Pretoria.
- Life Orientation is excluded in the calculation of the APS.
- Grade 11 final examination results, the NBT results as well as a Value-added Questionnaire will be used for the provisional admission of prospective students.
- Admission to Health Sciences programmes is subject to a selection process.
- For selection purposes the sum of the results in six subjects, including English, Mathematics and Physical Science or Life Sciences, is calculated.
- Candidates, please note that your APS may not drop with more than two points in your final school examination results in order to maintain your provisional admission.
- PLEASE NOTE that compliance with the minimum admission requirements does not necessarily guarantee admission to any programme in this Faculty.
- Selection queries may be directed to healthapplications@up.ac.za.

Minimum requirements												
Achievement level

Other programme-specific information

Students who obtain a 4 or 5 in the compulsory Academic Literacy Test (TALL) will be exempted from the ELH 121 and ELH 122 modules.

Examinations and pass requirements

- In accordance with the stipulations of the General Regulations, no minimum year or semester mark is needed for admission to the examination, and all registered students are admitted to the examination automatically.
- The final mark for a specific module is calculated from the examination mark as well as the mark compiled from the evaluation of a student during continuous, objective and controlled assessment opportunities during the course of the semester/year. A final mark of at least 50% is required to pass.
- In the case of modules with practical components, students are required to also comply with the applicable attendance requirements with regard to acquiring practical skills before a pass mark can be obtained for the module.
- There are two main examination opportunities per annum, the first and second examination. In respect of first-semester modules, the first examination opportunity is in May/June and the second examination opportunity in July. In respect of second-semester modules, the first examination opportunity is in October/November and the second examination opportunity in November/ December of the same year. Only two examination opportunities per module are allowed. If a student fails a module at the second examination opportunity, the module must be repeated.
- A second examination opportunity in a module is granted to students in the following cases:
 - If a student obtains a final mark of less than 50% in the relevant module at the first examination opportunity and thus fails.
 - If a student does not obtain the subminimum in the examination, as required for a specific module.
 - If a student does not sit the examination in a module at the first examination opportunity due to illness, official UP recognised sports participation or extraordinary circumstances.
- If a student fails a module at the first examination opportunity, the examination mark obtained in the relevant module at the second examination opportunity will be calculated as the final mark. The marks obtained with continuous evaluation during the course of the semester/year will not be taken into calculation. If the student passes the module at the second examination opportunity, a maximum of 50% is awarded as a pass mark to the module in question.
- If a student could not sit the examination in a module at the first examination opportunity due to illness, official UP recognised sports participation or extraordinary circumstances, the continuous evaluation mark, together with the examination mark obtained in the module in question at the second examination opportunity, will be calculated as the final mark obtained in the module.
- A student requiring a limited number of modules to complete his or her degree, may in terms of faculty regulations, be admitted to a special examination in the modules in question.

Promotion to next study year

Admission to the second year of study

- To be admitted to the second year of study, a student must pass PRC 100, EXE 110, FSG 110, MTL 180, ANA 123, EXE 120 and FSG 120.
- Modules can only be repeated if they can be accommodated within the existing examination timetable.

iii. Students who are repeating the first year of study, retain credit for examination modules passed.

Admission to the third year of study

- i. To be admitted to the third year of study, a student must have passed all the first and second-year modules.
- ii. Students who are repeating the second year of study, retain credit for examination modules passed.

Academic exclusion

- i. A student following the BSportSci programme will only be allowed one opportunity to repeat a year of study.
- ii. A student who does not comply with the abovementioned requirements but nevertheless wishes to be admitted to the School, may request the Dean/Chairperson in writing to consider his or her application for readmission in accordance with the prescribed procedure.

Pass with distinction

BSportSci degree

The degree is conferred with distinction on a student who obtains a cumulative average of at least 75% for all modules over the three years of study.

Curriculum: Year 1

Minimum credits: 138

Fundamental modules

Academic information management 111 (AIM 111)

Module content:

Find, evaluate, process, manage and present information resources for academic purposes using appropriate technology.

Module credits 4.00

Service modules

Faculty of Engineering, Built Environment and Information Technology
Faculty of Education
Faculty of Economic and Management Sciences
Faculty of Humanities
Faculty of Law
Faculty of Health Sciences
Faculty of Natural and Agricultural Sciences
Faculty of Theology and Religion

Prerequisites No prerequisites.

Contact time 2 lectures per week

Language of tuition Separate classes for Afrikaans and English

Department Information Science

Period of presentation Semester 1

Academic information management 121 (AIM 121)

Module content:

Apply effective search strategies in different technological environments. Demonstrate the ethical and fair use of information resources. Integrate 21st-century communications into the management of academic information.

Module credits 4.00

Service modules

Faculty of Engineering, Built Environment and Information Technology
Faculty of Education
Faculty of Economic and Management Sciences
Faculty of Humanities
Faculty of Law
Faculty of Health Sciences
Faculty of Natural and Agricultural Sciences
Faculty of Theology and Religion
Faculty of Veterinary Science

Prerequisites No prerequisites.

Contact time 2 lectures per week

Language of tuition Separate classes for Afrikaans and English

Department Informatics

Period of presentation Semester 2

Academic English for Health Sciences (BCur, BDietetics, BOH, BOccTher, BRad and BPhysT) 121 (ELH 121)

Module content:

Academic reading as well as academic writing and presentation skills, based on the approach followed in the healthcare sciences. **Presented to students in Health Sciences only.*

Module credits 6.00

Service modules Faculty of Health Sciences

Prerequisites No prerequisites.

Contact time 1 discussion class per week, 2 lectures per week

Language of tuition Module is presented in English

Department Unit for Academic Literacy

Period of presentation Semester 1

Academic English for Health Sciences 122 (ELH 122)

Module content:

Study of specific language skills required in the Health Care Sciences, including interviewing and report-writing skills. **Presented to students in Health Sciences only.* (BCur, BDietetics, BOH, BOT, Brad, BPhysT)*

Module credits 6.00

Service modules Faculty of Health Sciences

Prerequisites No prerequisites.

Contact time 1 discussion class per week, 2 lectures per week

Language of tuition Module is presented in English

Department Unit for Academic Literacy

Period of presentation Semester 2

Academic orientation 110 (UPO 110)

Module credits 0.00

Language of tuition Module is presented in English

Department Health Sciences Deans Office

Period of presentation Year

Core modules

Introduction to human anatomy 123 (ANA 123)

Module content:

*Closed - requires departmental selection

This module serves as the foundation of the necessary knowledge required to understand human anatomy as well as facilitate the students' understanding in future applied anatomy modules. This module covers the following aspects of human anatomy: anatomical terminology, osteology, arthrology, the muscular system, the nervous system, the cardiovascular system and the respiratory system.

Module credits	8.00
Prerequisites	No prerequisites.
Contact time	2 lectures per week
Language of tuition	Module is presented in English
Department	Anatomy
Period of presentation	Year

Sports injuries I 110 (EXE 110)

Module content:

*Closed - requires departmental selection

This module serves as an introduction to the fundamental concepts related to sports injuries.

Module credits	12.00
Prerequisites	No prerequisites.
Contact time	3 lectures per week
Language of tuition	Module is presented in English
Department	Biokinetics and Sports Science
Period of presentation	Semester 1

Research I 111 (EXE 111)

Module content:

*Closed - requires departmental selection

This module serves an introduction to research and information technology in Sport and Exercise which include computer skills; research techniques; library services and functions; literature searches; referencing techniques; plagiarism as well as ethics and theories in research. The content not only covers the steps of the research process but also explains the researcher's role in the research process.

Module credits	12.00
Prerequisites	No prerequisites.

Contact time	3 lectures per week
Language of tuition	Module is presented in English
Department	Biokinetics and Sports Science
Period of presentation	Semester 1

Motor learning and development I 120 (EXE 120)

Module content:

*Closed – requires departmental selection

The module focuses on a study, critique and analysis of the development of movement skills in humans from infancy to older adulthood, and on an examination of the way different motor, cognitive and social abilities affect how, when and why an individual learns motor skills. Students will gain a basic understanding of the fundamental concepts related to motor learning and motor development, and will be provided with a solid background regarding the fundamental motor skills developed during childhood and adolescence.

Module credits	12.00
Contact time	3 lectures per week
Language of tuition	Module is presented in English
Department	Biokinetics and Sports Science
Period of presentation	Semester 2

Exercise science programme development 121 (EXE 121)

Module content:

*Closed – requires departmental selection

This module focuses on the basic principles of exercise programme design. Students will gain a basic understanding of the fundamental concepts related to exercise and will be provided with a solid background regarding the development of an exercise program. Programme development aspects for cardiorespiratory exercise, weight management and body composition programs, stretching and flexibility training, strength and endurance training, speed development and plyometrics, balance and proprioception programs, exercise selection, and periodisation are included.

Module credits	12.00
Contact time	3 lectures per week
Language of tuition	Module is presented in English
Department	Biokinetics and Sports Science
Period of presentation	Semester 2

Measurement and evaluation I 122 (EXE 122)

Module content:

*Closed – requires departmental selection

This module introduces students to physical fitness assessment, fitness test administration, exercise testing principles and procedures, assessment of fitness components, test quality in exercise science, evaluating and interpreting test data.

Module credits	12.00
Contact time	3 lectures per week
Language of tuition	Module is presented in English
Department	Biokinetics and Sports Science
Period of presentation	Semester 2

Physiology 110 (FSG 110)

Module content:

Introduction (terminology and anatomical orientation); chemical principles; cytology and histology; neuro-physiology and the senses; haematology and body fluids; cardiovascular system.

Module credits	6.00
Service modules	Faculty of Humanities Faculty of Natural and Agricultural Sciences
Prerequisites	No prerequisites.
Contact time	3 lectures per week
Language of tuition	Module is presented in English
Department	Physiology
Period of presentation	Semester 1

Physiology 120 (FSG 120)

Module content:

Respiratory system; nutrition; digestion and metabolism; kidneys and acid-base equilibrium; endocrinology; reproduction physiology and reproduction; skin and body temperatures.

Module credits	6.00
Service modules	Faculty of Humanities Faculty of Natural and Agricultural Sciences
Prerequisites	FSG 110
Contact time	3 lectures per week
Language of tuition	Module is presented in English
Department	Physiology
Period of presentation	Semester 2

Medical terminology 180 (MTL 180)

Module content:

The acquisition of a basic medical orientated vocabulary compiled from Latin and Greek stem forms combined with prefixes and suffixes derived from those languages. The manner in which the meanings of medical terms can be determined by analysing the terms into their recognisable meaningful constituent parts, is taught and exercised. The functional use of medical terms in context as practical outcome of terminological application is continually attended to.

Module credits 12.00

Service modules Faculty of Health Sciences
Faculty of Natural and Agricultural Sciences
Faculty of Veterinary Science

Prerequisites No prerequisites.

Contact time 2 lectures per week

Language of tuition Afrikaans and English are used in one class

Department Ancient and Modern Languages and Cultures

Period of presentation Semester 1 and Semester 2

Physics for biology students 131 (PHY 131)

Module content:

Units, vectors, one dimensional kinematics, dynamics, work, equilibrium, sound, liquids, heat, thermodynamic processes, electric potential and capacitance, direct current and alternating current, optics, modern physics, radio activity.

Module credits 16.00

Service modules Faculty of Education
Faculty of Health Sciences
Faculty of Veterinary Science

Prerequisites A candidate must have passed Mathematics with at least 60% in the Grade 12 examination

Contact time 1 discussion class per week, 1 practical per week, 4 lectures per week

Language of tuition Separate classes for Afrikaans and English

Department Physics

Period of presentation Semester 1

Sports practical 100 (PRC 100)

Module content:

*Closed - requires departmental selection.

This module will serve as the foundation for swimming, netball, athletics and gymnasium movement skill

acquisition. The module serves as exposure to and experience in the movement skills practiced in swimming, netball, athletics and gymnasium. This will aid the Sport Scientist and Biokineticist to better understand and condition clients and patients practicing these sports. Sports-specific skills, team situation; rules and regulations, refereeing; game analysis; coaching.

Module credits	12.00
Contact time	2 practicals per week
Language of tuition	Module is presented in English
Department	Biokinetics and Sports Science
Period of presentation	Year

Curriculum: Year 2

Minimum credits: 141

Core modules

Motor learning and development II 221 (EXE 221)

Module content:

*Closed – requires departmental selection

An analysis and critique of how motor learning is affected by adulthood and aging and how to design appropriate programmes to maximise motor skill acquisition.

Module credits	16.00
Prerequisites	EXE 120
Contact time	3 lectures per week
Language of tuition	Module is presented in English
Department	Biokinetics and Sports Science
Period of presentation	Semester 2

Sports injuries II 222 (EXE 222)

Module content:

*Closed – requires departmental selection

The module aims to further the knowledge and application of fundamentals concepts related to sports injuries.

Module credits	16.00
Prerequisites	EXE 110
Contact time	3 lectures per week
Language of tuition	Module is presented in English
Department	Biokinetics and Sports Science
Period of presentation	Semester 2

Nutrition for exercise and sport 223 (EXE 223)

Module content:

*Closed – requires departmental selection

Understanding the basic principles of substrate location and utilization in an exercise and sport-related context, as well as the application of nutrition recommendations for exercise and sport.

Module credits	16.00
Contact time	3 lectures per week

Language of tuition Module is presented in English

Department Human Nutrition

Period of presentation Semester 2

Basic emergency care 286 (GNK 286)

Module content:

Theory and practical training in basic emergency care.

Module credits 5.00

Prerequisites CMY 151, FIL 155, MGW 112, MLB 111, PHY 131, MTL 180, GNK 120, BOK 121, GNK 127, GNK 128, CIL 111 and 121 or AIM 101 or AIM 111 and 121 EOT 110 and 120 or ELH 111 and 112

Contact time 1 other contact session per week, 8 practicals per week

Language of tuition Module is presented in English

Department Health Sciences Deans Office

Period of presentation Semester 1 and/or 2

Sports practical II 201 (PRC 201)

Module content:

*Closed - requires departmental selection

This module will serve as the foundation for rugby, hockey, cricket and tennis movement skill acquisition. This module serves as exposure to and experience in the movement skills practiced in rugby, hockey, cricket and tennis. This will aid the Sport Scientist and Biokineticist to better understand and condition clients and patients practicing these sports.

Module credits 16.00

Prerequisites PRC 100

Contact time 2 practicals per week

Language of tuition Module is presented in English

Department Biokinetics and Sports Science

Period of presentation Year

Exercise physiology I 212 (SMC 212)

Module content:

*Closed - requires departmental selection

Homeostasis, thermoregulation, bone and connective tissue adaptations, muscle adaptations, and muscle force development.

Module credits	14.00
Contact time	3 lectures per week
Language of tuition	Module is presented in English
Department	Biokinetics and Sports Science
Period of presentation	Semester 1

Biomechanics I 213 (SMC 213)

Module content:

*Closed – requires departmental selection

This module focuses on the biomechanical principles involved in human movement and sports activities. It comprises primarily of the study of linear and angular kinematics and kinetics of human motion and introduces the student to various applications and measurement techniques used in biomechanics.

Module credits	16.00
Contact time	3 lectures per week
Language of tuition	Module is presented in English
Department	Biokinetics and Sports Science
Period of presentation	Semester 1

Human anatomy II 214 (SMC 214)

Module content:

*Closed – requires departmental selection

This module builds on the knowledge attained in ANA 123 and involves comprehensive study of the muscular system (origin, insertion, action and nerve supply of the muscles of the human body) and the nervous system.

Module credits	16.00
Prerequisites	ANA 123
Contact time	3 lectures per week
Language of tuition	Module is presented in English
Department	Biokinetics and Sports Science
Period of presentation	Semester 1

Exercise physiology II 221 (SMC 221)

Module content:

*Closed – requires departmental selection

Exercise metabolism, cardiovascular adaptations, respiratory adaptations, and water, electrolyte and acid-base balance responses to exercise.

Module credits	14.00
Prerequisites	SMC 212
Contact time	3 lectures per week
Language of tuition	Module is presented in English
Department	Biokinetics and Sports Science
Period of presentation	Semester 2

Event and facility management 211 (SMS 211)

Module content:

*Closed - requires departmental selection

This module will provide the basic knowledge of management (planning, leading, organising and controlling) of sporting and health promotion events and exercise facilities.

Module credits	12.00
Contact time	2 lectures per week
Language of tuition	Module is presented in English
Department	Sport and Leisure Studies
Period of presentation	Semester 2

Curriculum: Final year

Minimum credits: 130

Core modules

Exercise science programme development II 310 (BGN 310)

Module content:

*Closed – requires departmental selection

The module focuses on the practical application of the fundamental concepts related to exercise as well as principles for exercise programme design.

Module credits	15.00
Contact time	1 lecture per week, 1 practical per week
Language of tuition	Module is presented in English
Department	Biokinetics and Sports Science
Period of presentation	Semester 1

Measurement and evaluation II 320 (BGN 320)

Module content:

*Closed – requires departmental selection

This module includes the theoretical study and practical demonstration of exercise tests for health-related and sport-related physical fitness components, as well as exercise test data interpretation, evaluation and reporting.

Module credits	15.00
Contact time	1 lecture per week, 1 practical per week
Language of tuition	Module is presented in English
Department	Biokinetics and Sports Science
Period of presentation	Semester 1

Biomechanics II 321 (BGN 321)

Module content:

*Closed – requires departmental selection

This unit involves the application of biomechanical principles to analyse human motion using various biomechanical methods. Students will learn to collect and analyse two-dimensional video and force platform data, with a focus on gait analysis and exercise training techniques.

Module credits	15.00
Contact time	1 practical per week, 2 lectures per week
Language of tuition	Module is presented in English

Department Biokinetics and Sports Science

Period of presentation Semester 2

Research II 301 (EXE 301)

Module content:

*Closed – requires departmental selection

In this module the focus will be on fundamental quantitative or experimental research methodology, and statistics. The student will have the opportunity to demonstrate an understanding of the module through the medium of a written theoretical examination and a research proposal.

Module credits 20.00

Prerequisites EXE 111

Contact time 2 lectures per week

Language of tuition Module is presented in English

Department Biokinetics and Sports Science

Period of presentation Year

Sports injuries III 310 (EXE 310)

Module content:

*Closed – requires departmental selection

Theoretical knowledge will be gained in the understanding of region specific sport injuries. This includes the mechanism of injury, type of injury, assessment and management of the sport injury.

Module credits 15.00

Prerequisites EXE 222

Contact time 3 lectures per week

Language of tuition Module is presented in English

Department Biokinetics and Sports Science

Period of presentation Semester 1

Sports psychology 212 (MBK 212)

Module content:

*Closed – requires departmental selection

In this module students will form an understanding of the multi-dimensional nature of sport psychology, with specific reference to Performance Termination (PT), Performance Dysfunction (PDy), Performance Impairment (PI) and Performance Development (PD) as portrayed in the Multi-Level Classification System for Sport Psychology (MCS-SP). Through studying the MCS-SP students will understand the role of sport psychologists in the sport

context, how sport psychology focuses on the psychological well-being of athletes within sport organizations, as well as the psychological aspects that contribute to excellence in sport performance.

Module credits	10.00
Contact time	2 lectures per week
Language of tuition	Module is presented in English
Department	Sport and Leisure Studies
Period of presentation	Semester 1

Exercise science practice 301 (PRC 301)

Module content:

*Closed - requires departmental selection

This module serves as the platform for supervised practical training and application in exercise testing and interpretation for sport-related physical fitness components, exercise programme design and implementation for sport-related physical fitness, and sport science work experience. This module requires the student to have accumulated 45 hours of Sport First aid.

Module credits	20.00
Contact time	2 practicals per week
Language of tuition	Module is presented in English
Department	Biokinetics and Sports Science
Period of presentation	Year

Exercise physiology III 320 (SMC 320)

Module content:

*Closed - requires departmental selection.

Allotaxis, energy dynamics, fatigue, immune system considerations, muscle hypertrophy, DOMS, NSAIDs, environmental physiology.

Module credits	20.00
Prerequisites	SMC 221
Contact time	1 tutorial per week, 2 lectures per week
Language of tuition	Module is presented in English
Department	Biokinetics and Sports Science
Period of presentation	Semester 2
