## Electronic defence - electronic countermeasures 780 (ELB 780)

| Qualification          | Postgraduate   |
|------------------------|--|
| Faculty                | Faculty of Engineering, Built Environment and Information Technology |
| Module credits         | 32.00  |
| Programmes             | BEngHons Computer Engineering  |
|                        | BEngHons Electronic Engineering                                      |
| Prerequisites          | No prerequisites.  |
| Contact time           | 10 lectures per week   |
| Language of tuition    | Module is presented in English                                       |
| Department             | Electrical, Electronic and Computer Engineering                      |
| Period of presentation | Semester 1 or Semester 2   |

## **Module content**

Radar, including aspects such as: radar frequency bands and their characteristics, radar types (eg tracking vs search radar), the radar range equation, radar cross-section (RCS), target characteristics such as scintillation and glint, pulse compression, coherent and non-coherent integration (eg Doppler processing), range and Doppler ambiquities, target tracking including simple tracking filters and angle-tracking techniques (eg monopulse), high range-resolution (HRR) techniques, and environmental effects such as atmospheric attenuation and multipath. Electronic attack (EA) - also referred to as jamming or electronic countermeasure (ECM) - including the relationship between good system design and EP, and basic EP techniques to counter the EA techniques listed above.
