

## University of Pretoria Yearbook 2019

## The science of data analytics 353 (STK 353)

| Qualification          | Undergraduate                                               |
|------------------------|-------------------------------------------------------------|
| Faculty                | Faculty of Economic and Management Sciences                 |
| Module credits         | 25.00                                                       |
| Programmes             | BCom Statistics                                             |
|                        | BSc Computer Science                                        |
|                        | BSc Applied Mathematics                                     |
|                        | BSc Mathematical Statistics                                 |
|                        | BSc Mathematics                                             |
|                        | BSc Physics                                                 |
|                        | BScAgric Agricultural Economics and Agribusiness Management |
| Service modules        | Faculty of Natural and Agricultural Sciences                |
| Prerequisites          | STK 210, STK 220 or WST 211, WST 221                        |
| Contact time           | 1 practical per week, 3 lectures per week                   |
| Language of tuition    | Module is presented in English                              |
| Department             | Statistics                                                  |
| Period of presentation | Semester 2                                                  |

## **Module content**

Sampling: basic techniques in probability, non-probability, and resampling methods. Designing experiments: experimental and control groups, different data types and relationships. Big and small data: exploring popular trends used in practice. Consultation practice: ethical considerations, study design, data collection and presentation, report writing and presentation. Hands-on application of statistical software and packages to real-life datasets.
