

University of Pretoria Yearbook 2019

Mathematical optimisation 750 (WTW 750)

Qualification Postgraduate

Faculty [Faculty of Natural and Agricultural Sciences](#)

Module content Classical optimisation: Necessary and sufficient conditions for local minima. Equality constraints and Lagrange multipliers. Inequality constraints and the Kuhn-Tucker conditions. Application of saddle point theorems to the solutions of the dual problem. One-dimensional search techniques. Gradient methods for unconstrained optimisation. Quadratically terminating search algorithms. The conjugate gradient method. Fletcher-Reeves. Second order variable metric methods: DFP and BFCS. Boundary following and penalty function methods for constrained problems. Modern multiplier methods and sequential quadratic programming methods. Practical design optimisation project.

Module credits 15.00

Programmes [BScHons Applied Mathematics](#)

[BScHons Financial Engineering](#)

[BScHons Mathematics and Mathematics Education Algebra and Analysis](#)

[BScHons Mathematics and Mathematics Education Applied Analysis](#)

[BScHons Mathematics and Mathematics Education Differential Equations and Modelling](#)

[BScHons Mathematics of Finance](#)

Prerequisites Multivariate Calculus on 2nd-year level; Linear Algebra on 2nd-year level

Contact time 2 lectures per week

Language of tuition Module is presented in English

Department Mathematics and Applied Mathematics

Period of presentation Semester 1

The information published here is subject to change and may be amended after the publication of this information. The [General Regulations \(G Regulations\)](#) apply to all faculties of the University of Pretoria. It is expected of each student to familiarise himself or herself well with these regulations as well as with the information contained in the [General Rules](#) section. Ignorance concerning these regulations and rules will not be accepted as an excuse for any transgression.
