

# University of Pretoria Yearbook 2019

## PhD Water Resource Management (02261043)

**Minimum duration of study** 2 years

**Total credits** 360

### Programme information

#### Duration of studies

The doctorate is conferred on a student only if one of the following periods has expired:

- At least four years after complying with all the requirements for a three-year bachelor's degree.
- At least three years after complying with all the requirements for a four-year bachelor's degree.
- At least two years after complying with all the requirements for a bachelor's degree of five years or more.
- At least two years after complying with all the requirements for a master's degree.
- With the exception of a shorter period that may be approved by the Dean, at least 12 months since registration for the doctorate at this University has expired.

The relevant head of department may set specific residential requirements for students who are required to live on campus.

#### Renewal of registration

Subject to other faculty regulations, a student for a doctorate must complete his or her studies within three years after first registering for the degree. Under special circumstances, the Dean, on the recommendation of the relevant head of department or the Postgraduate Committee, may give approval for a limited fixed extension of this period.

#### Curriculum

The curriculum for the PhD degree consists of the following:

- Theoretical knowledge of the major subject/s and such additional modules as may be prescribed.
- A thesis.

#### Conversion of a master's to doctoral study

The stipulations of G.41 apply as follows:

##### 1. Requirements

- Under special circumstances, the dean of a faculty may convert the registration of a candidate for the master's degree to registration for a doctoral degree.
- For such conversions, the relevant head of department and the supervisor must be satisfied that the student's completed work is of the standard that would be expected of a doctoral student, that the student is capable of completing a doctoral degree, and that the project is of appropriate standard and scope to constitute a doctoral study.
- For such conversions, the relevant head of department and the supervisor must be satisfied that the student

has demonstrated that he or she has the potential to fulfil the requirements of a doctoral degree without having completed a master's degree.

## 2. Process

- a. Application for conversion may be submitted at any time during the course of study for the master's degree.
- b. The application for the conversion must include the following documentation:
  - i. A detailed progress report by the candidate of the work completed for the master's project. The report must provide proof that the results obtained thus far are of such a standard and scientific significance that they justify conversion to a doctoral project. The report should include details of presentations made at conferences and of material that has been submitted for publication and/or published.
  - ii. A detailed proposal for the intended doctoral project, written by the candidate, including the objectives of the project.
  - iii. A recommendation by the supervisor with specific comments on the ability of the applicant as a potential doctoral candidate as well as the feasibility of the conversion, especially with regard to the information provided by the candidate in his/her reports (items (i) and (ii)).
  - iv. A recommendation by the relevant head of department, if he or she is not the supervisor, in which the ability of the candidate as a potential doctoral candidate is confirmed.
  - v. If the Dean considers it advisable for the faculty, the candidate may be required to present a seminar to the department in support of the application. In this case, the relevant head of department should include a report on this in his or her recommendation.
- c. The application of the candidate, together with the reports and recommendations, is submitted for consideration to the Dean, (who may delegate to the Chairperson of the Faculty Postgraduate Committee) for approval. The decision should be submitted to the Faculty Board for approval.

## General

Candidates are required to familiarise themselves with the General Regulations regarding the maximum duration of study and the requirements to submit an article/s for publication.

## Admission requirements

- Admission is dependent on the candidate being in possession of an MSc in Water Resource Management or an equivalent degree with the status thereof as evaluated by the Director of the Centre for Environmental Studies and the head(s) of the particular department(s).
- In addition to further theoretical studies as prescribed by the Director and head(s) of the relevant department, the study will involve a doctoral research thesis under guidance of a supervisor selected by the Director and head of department during which the student needs to prove that he/she can publish at least one research paper in an international peer-reviewed scientific journal. The supervisor will be a suitable academic staff member of the University of Pretoria.
- Admission is additionally dependent on availability of supervisor/s and/or projects within the department.

## Other programme-specific information

### Additional possible electives in Environmental studies

Any module at master's level in either diplomatic studies or political policy studies as approved by the Head of the Department of Political Sciences and the Director of the Centre for Environmental Studies.

## Examinations and pass requirements

- i. Consult the General Regulations that apply to the calculation of marks.
- ii. In order to obtain the PhD degree the candidate must:
  - pass the examinations and the prescribed modules, as determined in the study programme;
  - pass the thesis; and
  - pass the final examination on the thesis and general subject knowledge.

## Curriculum: Year 1

### Core modules

#### Thesis: Water resource management 990 (ENV 990)

**Module credits** 360.00

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** Biochemistry, Genetics and Microbiology

**Period of presentation** Year

---

## Curriculum: Final year

### Core modules

#### Thesis: Water resource management 990 (ENV 990)

<b>Module credits</b>	360.00
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Biochemistry, Genetics and Microbiology
<b>Period of presentation</b>	Year
