## Green Manufacturing 823 (GIC 823)

<b>Qualification</b>	Postgraduate
<b>Faculty</b>	<a href="#">Gordon Institute of Business Science</a>
<b>Module credits</b>	12.00
<b>Contact time</b>	28 contact hours per 3 week cycle
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Gordon Institute of Business Science
<b>Period of presentation</b>	Semester 2

### Module content

Manufacturing is often derided as a polluting activity responsible for much of the damage that has been done to the world's environment. Limiting the environmental damage of manufacturing (while continuing to benefit from the wealth it creates) has consequently become a central focus of policy makers and business executives, hence the growth of environmental laws (and taxes) governing manufacturing processes and manufactured products, and the associated setting of specific environmentally-based standards through manufacturing supply chains. This elective will focus on the latest legislative requirements governing manufacturing processes.

The information published here is subject to change and may be amended after the publication of this information. The [General Regulations \(G Regulations\)](#) apply to all faculties of the University of Pretoria. It is expected of students to familiarise themselves well with these regulations as well as with the information contained in the [General Rules](#) section. Ignorance concerning these regulations and rules will not be accepted as an excuse for any transgression.
