## Contemporary issues in supply chain management 2 887 (GIC 887)

<b>Qualification</b>	Postgraduate
<b>Faculty</b>	<a href="#">Gordon Institute of Business Science</a>
<b>Module credits</b>	6.00
<b>Contact time</b>	28 contact hours per 3 week cycle
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Gordon Institute of Business Science
<b>Period of presentation</b>	Semester 2

### Module content

The supply chain plays a vital role in the success of organisations. Supply chain management is responsible for ensuring the flow of products, information and money to ensure value is added to the end consumers and return on capital employed for the entire supply chain is improved. As the networks become more complex, with more variability and the customer's expectation of shorter lead times, there is a need to give students a more in-depth understanding of this function, viewed from a systems perspective. This means the focus has to change from make and sell what can be made (push-and -promote) to make and sell what can be sold (position-and-pull). More detail is provided in the elective manual.

The information published here is subject to change and may be amended after the publication of this information. The [General Regulations \(G Regulations\)](#) apply to all faculties of the University of Pretoria. It is expected of students to familiarise themselves well with these regulations as well as with the information contained in the [General Rules](#) section. Ignorance concerning these regulations and rules will not be accepted as an excuse for any transgression.
