Period of presentation	Semester 2

Module content

This elective aims to introduce students to the theoretical foundation of modern portfolio theory, the important types of investments, the different types of investors and the diversity of investment objectives. The theoretical foundation will be understood through an introduction to the mathematics of portfolio construction and diversification which will guide students' understanding of equity portfolio management strategies and portfolio performance evaluation.

The information published here is subject to change and may be amended after the publication of this information. The [General Regulations \(G Regulations\)](#) apply to all faculties of the University of Pretoria. It is expected of students to familiarise themselves well with these regulations as well as with the information contained in the [General Rules](#) section. Ignorance concerning these regulations and rules will not be accepted as an excuse for any transgression.
