

University of Pretoria Yearbook 2020

Introduction to research methodology 710 (HME 710)

Qualification	UPOnline
Faculty	Faculty of Health Sciences
Module credits	10.00
Programmes	PGDip in Public Health (UPOnline)
Prerequisites	PHM 710
Contact time	Fully online
Language of tuition	Module is presented in English
Department	School of Health System and Public Health
Period of presentation	UPOnline Short Intake 1 - 6

Module content

To learn to “think epidemiologically”. The principles of epidemiology including applied epidemiology. The use of EpiData software for questionnaire design and data collection. Rates ratios and proportions; Basic study designs used in epidemiology (include cross-sectional, cohort, case-control, ecological, RCTs. Also sub-groups such as MCC, Historical cohort, Nested C-C). Validity, repeatability, confounding, effect modification; Sources and types of bias; sampling methods, probabilistic and non-probabilistic; stratified and cluster sampling; designing questionnaires and questionnaire items; calculating odds ratios, relative proportions relative risks and incidence rate ratios and the correct interpretation of these. ID epi (host/agent/environment model, R0, attack rates, outbreak investigations). Clinical epidemiology (sensitivity specificity predictive values). Operational research basic principles only.

The information published here is subject to change and may be amended after the publication of this information. The [General Regulations \(G Regulations\)](#) apply to all faculties of the University of Pretoria. It is expected of students to familiarise themselves well with these regulations as well as with the information contained in the [General Rules](#) section. Ignorance concerning these regulations and rules will not be accepted as an excuse for any transgression.
