<b>Programmes</b>	<a href="#">BA</a> <a href="#">BA Languages</a> <a href="#">BPolSci International Studies</a> <a href="#">BSocSci Heritage and Cultural Tourism</a> <a href="#">BSc Chemistry</a> <a href="#">BSc Geography and Environmental Science</a> <a href="#">BSc Meteorology</a>
<b>Prerequisites</b>	ENV 101 or WKD 155 or BOT 161 or ZEN 161.
<b>Contact time</b>	1 practical per week, 3 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Geography Geoinformatics and Meteorology
<b>Period of presentation</b>	Quarter 2

### Module content

Introduces basic concepts and interrelationships required to understand our atmosphere, with a strong focus on an introduction to weather and climate. A key component of the course is an introduction to climate change, including the science of climate change, introducing climate change projections, and climate change impacts. A key focus of the second part of the course will be climate change implications for the attainment of SDGs and Aichi targets on the African continent, under a range of plausible scenarios.

The information published here is subject to change and may be amended after the publication of this information. The [General Regulations \(G Regulations\)](#) apply to all faculties of the University of Pretoria. It is expected of students to familiarise themselves well with these regulations as well as with the information contained in the [General Rules](#) section. Ignorance concerning these regulations and rules will not be accepted as an excuse for any transgression.
