### Module content

The systematic comparative study of political phenomena on a regional, continental or global basis using comparative methodologies. This will enable the analysis of political practice and the considerable variations across regions, continents and in the world. The growing importance of global influences and interdependence between regions and local politics require the development of specific knowledge and skills by students to explore the reasons for the variations and to develop possible responses to these.

The information published here is subject to change and may be amended after the publication of this information. The [General Regulations \(G Regulations\)](#) apply to all faculties of the University of Pretoria. It is expected of students to familiarise themselves well with these regulations as well as with the information contained in the [General Rules](#) section. Ignorance concerning these regulations and rules will not be accepted as an excuse for any transgression.
