

University of Pretoria Yearbook 2021

Partial differential equations of mathematical physics 776 (WTW 776)

| Qualification | Postgraduate |
|------------------------|--|
| Faculty | Faculty of Natural and Agricultural Sciences |
| Module credits | 15.00 |
| NQF Level | 08 |
| Programmes | BScHons Applied Mathematics |
| | BScHons Mathematics |
| | BScHons Mathematics and Mathematics Education Applied Analysis |
| | BScHons Mathematics and Mathematics Education Differential Equations and Modelling |
| | BScHons Mathematics and Mathematics EducationAlgebra and Analysis |
| | BScHons Mathematics of Finance |
| Prerequisites | WTW 710 or WTW 735 |
| Contact time | 2 lectures per week |
| Language of tuition | Module is presented in English |
| Department | Mathematics and Applied Mathematics |
| Period of presentation | Semester 2 |

Module content

Field-theoretic and material models of mathematical physics. The Friedrichs-Sobolev spaces. Energy methods and Hilbert spaces, weak solutions – existence and uniqueness. Separation of variables, Laplace transform, eigenvalue problems and eigenfunction expansions. The regularity theorems for elliptic forms (without proofs) and their applications. Weak solutions for the heat/diffusion and related equations.

The information published here is subject to change and may be amended after the publication of this information. The **General Regulations (G Regulations)** apply to all faculties of the University of Pretoria. It is expected of students to familiarise themselves well with these regulations as well as with the information contained in the **General Rules** section. Ignorance concerning these regulations and rules will not be accepted as an excuse for any transgression.
