

## University of Pretoria Yearbook 2022

## Chemical engineering 123 (CIR 123)

**Qualification** Undergraduate

Faculty Faculty of Engineering, Built Environment and Information Technology

Module credits 8.00

NQF Level 05

**Programmes** BEng (Chemical Engineering)

BEng (Chemical Engineering) ENGAGE

**Prerequisites** CIR 113 GS, CHM 171 GS

**Contact time** 2 lectures per week, 2 tutorials per week

**Language of tuition** Module is presented in English

**Department** Chemical Engineering

**Period of presentation** Semester 2

## **Module content**

Chemical reaction and stoichiometry, excess reactant, conversion, yield, selectivity. Material balances with recycle streams, bypass streams and purge streams. Gases, vapours and liquids: ideal gas law, SG and density of gases, Nm<sup>3</sup>. Material balances where gases are involved. Fuels and combustion: coal analysis, combustion calculations.

The regulations and rules for the degrees published here are subject to change and may be amended after the publication of this information.

The General Academic Regulations (G Regulations) and General Student Rules apply to all faculties and registered students of the University, as well as all prospective students who have accepted an offer of a place at the University of Pretoria. On registering for a programme, the student bears the responsibility of ensuring that they familiarise themselves with the General Academic Regulations applicable to their registration, as well as the relevant faculty-specific and programme-specific regulations and information as stipulated in the relevant yearbook. Ignorance concerning these regulations will not be accepted as an excuse for any transgression, or basis for an exception to any of the aforementioned regulations.
