<b>Contact time</b>	28 contact hours per 3 week cycle
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Gordon Institute of Business Science
<b>Period of presentation</b>	Semester 2

### Module content

The supply chain plays a vital role in the success of organisations. Supply chain management is responsible for ensuring the flow of products, information and money to ensure value is added to the end consumers and return on capital employed for the entire supply chain is improved. As the networks become more complex, with more variability and the customer's expectation of shorter lead times, there is a need to give students a more in-depth understanding of this function, viewed from a systems perspective. This means the focus has to change from make and sell what can be made (push-and -promote) to make and sell what can be sold (position-and-pull). More detail is provided in the elective manual.

The regulations and rules for the degrees published here are subject to change and may be amended after the publication of this information.

The [General Academic Regulations \(G Regulations\)](#) and [General Student Rules](#) apply to all faculties and registered students of the University, as well as all prospective students who have accepted an offer of a place at the University of Pretoria. On registering for a programme, the student bears the responsibility of ensuring that they familiarise themselves with the General Academic Regulations applicable to their registration, as well as the relevant faculty-specific and programme-specific regulations and information as stipulated in the relevant yearbook. Ignorance concerning these regulations will not be accepted as an excuse for any transgression, or basis for an exception to any of the aforementioned regulations.
