

University of Pretoria Yearbook 2023

Research in practice 806 (IPS 806)

Qualification	Postgraduate
Faculty	Faculty of Economic and Management Sciences
Module credits	30.00
NQF Level	09
Programmes	MCom (Industrial Psychology) (Coursework)
Prerequisites	No prerequisites.
Contact time	32 contact hours
Language of tuition	Module is presented in English
Department	Human Resource Management
Period of presentation	Year

Module content

Part 1: Research design and proposal development

Students will design a suitable research project by developing a research proposal commencing with the background, the problem statement and the purpose of the proposed study. An integrated and in-depth literature review follows, demonstrating academic scholarship in the field of study and the student's ability to reflect critically on their own and others' research. They will develop research questions or hypotheses and justify an appropriate methodology for the study. The proposal will include ethical considerations and the criteria for ethical conduct in doing research, adhering to UP's Code of ethics for scholarly activities (S4755/12). Students will present their proposals to a panel of members of D-HRM. Students will follow the APA guidelines in their academic writing.

Part 2: Qualitative research

Students will be proficient in advanced qualitative research methods, and knowledgeable of the relevant paradigms, designs, sampling procedures, data collection and analysis methods as well as the criteria for quality and rigour. Students will demonstrate reflexivity in applying these by conducting a qualitative research project of limited scope in which they justify their methodological choices.

Part 3: Quantitative research

Students will be proficient in quantitative research methods and the relevant paradigms, research designs, sampling procedures and data collection methods. They will be able to select and apply appropriate statistical models for different types of designs and justify their choices in line with the specific purpose of the study and data requirements. They will develop a practical ability to analyse data using SPSS and AMOS.

Regulations and rules

The regulations and rules for the degrees published here are subject to change and may be amended after the publication of this information.

The **General Academic Regulations (G Regulations)** and **General Student Rules** apply to all faculties and registered students of the University, as well as all prospective students who have accepted an offer of a place at the University of Pretoria. On registering for a programme, the student bears the responsibility of ensuring that they familiarise themselves with the General Academic Regulations applicable to their registration, as well as the relevant faculty-specific and programme-specific regulations and information as stipulated in the relevant yearbook. Ignorance concerning these regulations will not be accepted as an excuse for any transgression, or basis for an exception to any of the aforementioned regulations.

University of Pretoria Programme Qualification Mix (PQM) verification project

The higher education sector has undergone an extensive alignment to the Higher Education Qualification Sub-Framework (HEQF) across all institutions in South Africa. In order to comply with the HEQSF, all institutions are legally required to participate in a national initiative led by regulatory bodies such as the Department of Higher Education and Training (DHET), the Council on Higher Education (CHE), and the South African Qualifications Authority (SAQA). The University of Pretoria is presently engaged in an ongoing effort to align its qualifications and programmes with the HEQSF criteria. Current and prospective students should take note that changes to UP qualification and programme names, may occur as a result of the HEQSF initiative. Students are advised to contact their faculties if they have any questions.
